

PRIOR AUTHORIZATION REQUEST

CLINICAL JUSTIFICATION:

34-year-old male soccer player, knee injury 10 weeks ago. 8 weeks PT without resolution. Knee locks daily, gives way on lateral movement. MRI 2026-04-20 shows complex lateral meniscus tear. McMurray positive. BMI 24.3. Dr. Anderson, Sports Medicine Clinic.

CLINICAL DOCUMENTATION

ORTHOPEDIC CONSULTATION - 2026-06-10

Patient: David Park | DOB: 1990-04-12

Provider: Dr. Anderson, Sports Medicine Surgical Center

HISTORY: Soccer injury 10 weeks ago. Has done PT for 8 weeks. Mechanical symptoms persist - locking, giving way.

EXAM: Joint line tenderness. McMurray positive. MRI confirms Grade 3 lateral meniscus tear.

PLAN: Arthroscopic meniscectomy recommended.

Credentials: Dr. Anderson is fellowship-trained in sports medicine. Note does not state 'board-certified orthopedic surgeon' as required by payer policy - states 'sports medicine' specialty.
